

Valentine's Heart

Indoor object

SUPPLIES

500 gram Paverpol Bronze
Art Stone
Pavercolor Yellow Ochre
Pavercolor Terra Cotta
Felt heart (Dollar Tree) or make one
from card board
Styrofoam 23 cm x 23 cm x approx. 5
cm
hairspray

First layer: apply Paverpol and Art Stone

Use a brush to apply a good coat of Paverpol to the back and sides of the Styrofoam. Sprinkle Art Stone in the wet Paverpol and with a flat hand push the Art Stone in. Tap off the excess Art Stone.

Brush Paverpol to the front of the Styrofoam and repeat the process you did for the backside.

In a few spots you could rub off some of the Art Stone, to create a less monotone look.

Brush Paverpol to both sides of the heart, and place it on the Styrofoam square, before you lay it down, Brush some Paverpol on the art Stone surface; the heart will adhere better. Sprinkle Art Stone over the heart and press it in.

Second layer: Pavercolor

Sprinkle Pavercolor Terra Cotta on the sides of the Styrofoam and again with a flat hand rub it in, making circular movements with your hand. Apply as much color as you want. Do the same for the front, only on the heart.

Do the same with Pavercolor Yellow Ochre; only now on the areas outside the heart. Optional; go over the sides with some Yellow Ochre as well.

The best result will be achieved when the two colors on the outside of the heart blend together in a few areas. If you don't like a certain area; just repeat the whole process; Paverpol, Art Stone, Pavercolor. You can't go wrong!

Let it dry.

Next day, shake off excess Pavercolours and spray hairspray on front, back and sides. This prevents the colors from falling off. It makes the object a little bit darker, but that will disappear when the hairspray dries again.
